Professional SUMMARY

React and Java Spring Boot Developer with 1.7 years of experience in building scalable, secure, and high-performance web applications. Strong hands-on experience in **Spring Boot** microservices, RESTful APIs, JWT authentication, **RabbitMQ**, and **React** with **Redux Toolkit**. Proven ability to deliver end-to-end features for **SaaS-based products** with a focus on clean architecture, performance, and maintainability.

Technical skills

- **Programming Languages:** Java, JavaScript
 - **Backend Technologies:** Spring Boot, Spring Security, JPA/Hibernate, RESTful APIs, Microservices Architecture
 - **Frontend:** React.js, Angular, Ionic
 - **Messaging & Security:** RabbitMQ, JWT Authentication
 - **Databases:** PostgreSQL, MySQL, MongoDB
 - **DevOps & Tools:** Docker (basic), Git, GitHub, Bitbucket, Postman, JMeter
 - **Core Computer Science:** Data Structures & Algorithms, OOP, Exception Handling, Multithreading (basic)
-

WORK EXPERIENCE

Associate Software Engineer | MPC Cloud Consulting Pvt. Ltd | June 2024 – Present | Gurugram

- Designed and developed **Spring Boot-based RESTful microservices** for a **SaaS HRIS platform**, improving API response time by ~30% through optimized service architecture.
 - Implemented **JWT-based authentication and role-based authorization** using Spring Security, eliminating unauthorized access issues and strengthening overall application security.
 - Built **RabbitMQ-based asynchronous notification services**, doubling system scalability and reducing synchronous processing load by 40%.
 - Integrated backend microservices with **Angular and Ionic frontend applications**, reducing end-to-end data processing latency by 25% and ensuring a seamless user experience.
 - Followed **clean architecture and component-based design principles**, reducing code maintenance effort by 35% and improving scalability for future enhancements.
-

Expenses Asset Management

- Developed backend services using **Node.js and Express** with **RESTful APIs** to manage expenses and assets, reducing API response time by ~25% through optimized request handling.
 - Integrated frontend components with backend services using **React** and **Redux Toolkit**, implementing multiple dynamic forms and improving state management efficiency by 30%.
 - Designed reusable and configurable modules along with dynamic form structures to support evolving business requirements, reducing new feature development time by 35%.
 - Ensured a smooth end-to-end flow between UI, APIs, and database with robust validation and error handling, reducing runtime errors and failed requests by 40%.
-

EDUCATION

Master of Computer Application - 8.7 CGPA

Chitkara University

Sep 2022 - Oct 2024

Bachelor of Computer Application - 8.97 CGPA

Chitkara University

Aug 2019 - Aug 2022

CERTIFICATIONS

Master Spring Boot 3 & Spring Framework 6 - Udemy

2025

React JS course on Udemy - by Jannick leismann

2023

Certification of Participation – Accenture Hackathon

2023
